Program Outcome

After completing this specialization, you will have gained the knowledge, insights, and tools to successfully manage Supply Chain, Procurement and Operations Management, Trade-offs and Transformation. You will be able to evaluate the impact of new technologies on the supply chain and you will understand how the Supply Chain Management can play a fundamental role in making business more sustainable.

Graduation

Students who successfully complete the program will be awarded the Master of Science in Healthcare Supply Chain Management degree by the Supply Chain Institute. This degree is identical to that awarded to on-campus students. Graduates are then allowed to use the title Master of Science in Healthcare Supply Chain Management after their names.

Career Opportunities

The Master of Science in Healthcare Supply Chain Management program will prepare you for senior roles within a wide range of commercial and public healthcare organizations.

Admission Requirements

- Completed degree from a public or officially recognized university/higher education institution.
- Proof of English skills.
- Financial ability.

(*) SCI™ reserves the right to cancel the program in case the required minimum number of participants is not met.

Methods of Assessment

Students' knowledge and understanding of combined modules are assessed through online exams and case studies.

A hand in a black nitrile glove is shown holding a white icon of a factory with a truck and boxes. The background is a blurred image of a person in a blue surgical gown and mask.
